WHAT MAKES THE DIFFERENCE?

THE STRENGTH OF THE BRAND
ERARD has been present in the audiovisual integration market for over 50 years. Its products are renowned for their design and manufacturing quality.

CONCEPTION AND DESIGN
All our products are exclusively designed by our teams whose leitmotif is to create aesthetic, smart and functional products.

10 YEAR GUARANTEE
Thanks to in-depth design and meticulous production processes together with the quality of our materials and finish, we can guarantee all the products shown in this catalogue for 10 years*.

*Unless otherwise stated on the catalogue’s pages and with the exception of electronic articles.

ORIGINE FRANCE GARANTIE
The majority of our products is made in France and certified Origine France Garantie.

The ERARD® group is a historical player in the audiovisual accessories market. Its continuing growth draws on the development of 4 companies: ERARD® PRO, ERARD®, ERARD® D3C and ERARD® INDUSTRIE.

ERARD® Pro develops and markets solutions for the integration of professional audiovisual equipment: mounts and stands for all types of screens, indoor and outdoor display enclosures, video projector mounts...

ERARD® designs and markets solutions for the integration and connection of consumer audiovisual equipment: aerial accessories, mounts, furniture for television sets and connection systems.

ERARD® D3C is a specialist in audio, video and data signal processing. It manufactures custom-made cables for many sectors: audiovisual, IT, industry, medical... It also markets cables, connectors and cords known for their manufacturing quality.

ERARD® INDUSTRIE co-develops and manufactures metal-based products on behalf of the ERARD® group companies and third parties as part of its industrial subcontracting activities. Its 15,000 m² factory is located in Chavanoz, in the French department of Isère.

**TECHNICAL CHARACTERISTICS**

- Steel structure in black textured epoxy paint
- Steel column, swivelling and tilting
- Quality melamine wood panels from suppliers of the leading brands of kitchen and office furniture
- Load reinforcement under the top shelf
- Adjustable height for feet (386 or 450 mm)
- Large usable volume: 440 mm depth
- Opening system with gas springs and triple 2-axe adjustable concealed hinges
- Wide back openings for equipment ventilation
- Cable management

- Black screen-printed remote-friendly tempered glass door
- Technical compartment for power cable management
- Hatch for power cable storage and management
- Inductive Qi charging station
- Charger 4 USB

**Inductive Qi charging station for mobile phones**
Dimensions Ø68x28mm
Power supply: DC 5V 2A
Input: DC 5V 1.8A / Output: 5W
Cable length: 1.5 m
Wireless Power Certification

**Charger 4 USB**
Input: 100-240 VAC - 50/60 Hz
Output 1-4 USB A: 5V / 2.4A (Smart IC)
Smart IC function: Smart IC technology detects the charging needs of the devices connected to its USB ports (Smartphones, tablets...) and automatically delivers the output needed.

- Heating
- No glass for touchscreen installations

Bespoke product

Semi-outdoor casing created for the Parc des Princes - Installer: TAV
Outdoor protection
The IP code, for Ingress Protection, is described in the international standard CEI 60529. The IP code corresponds to the various degrees of protection provided by enclosures for electrical apparatus with voltage of 72.5 kilovolts or less.

The standard sets out:
- The definitions of the degrees of protection provided by enclosures for electrical apparatus with regard to:
  - Protection of persons against access to dangerous parts inside enclosures.
  - Protection of apparatus inside enclosures against penetration of solid foreign objects.
  - Protection of apparatus inside enclosures against the harmful effects of water penetration.
- The names of these degrees of protection.
- The requirements for each name.
- The tests to be carried out to check that enclosures meet requirements.

### EXAMPLE

Let’s take code IP54:
- IP stands for Ingress Protection (protection index).
- The number 54 comprises two numbers, the 5 indicates the degree of protection against contact and the penetration of solid foreign objects, the 4 gives the degree of protection against the harmful effects of water penetration. The table below shows that a piece of IP54 apparatus is protected against dust (5) and against water spray (4).

*Since the integrated screens are IP certified outdoor screens, these kiosks are not watertight. Please ensure that all other integrated equipment is also intended for outdoor use.*
DOOHKIOSK

TECHNICAL CHARACTERISTICS

- Bespoke outdoor kiosk
- Portrait orientation
- Steel casing – choice of colour
- Mobile screen mount for easy access to the back of the screen
- 4 security locks
- IP54
- Ventilation
- **Air filtration** to use it in any climatic environment
- 6mm anti-vandalism laminated glass (IK 09)
- Totem bolted from the inside for an integration with minimum floor space required

Options:

- 2 back-to-back screens
- Laminated anti-glare glass
- Heating
- Air-conditioning (after study)
- IP65 (after study)
- Temperature regulated by thermostat with air-conditioning and/or heating options
- PC mount
- Stainless steel
- Special harsh environment treatment

- Max length: 90 cm (002427), 146 cm (002447, 717254, 717255, 717256)
- Max height adjust: -25° to +25°
- Max projection angle: -30° to +25°
- Max tube diameter: 35 mm (002427, 002447), 30 mm (717254, 717255, 717256)
- Max projection distance: 60 cm to 150 cm

---

**Usage Examples**

- Ceiling attachment plate with independent adjustable settings on 3 axes.
- Hardware and spacer kit are supplied.

---

**Customer Support**

- 10-year guarantee on all products.
- Technical support available for installation and usage.

---

**Ordering Information**

- Purchase online at [website link]
- Contact sales for bulk orders or special installations.

---

**Specifications Summary**

- Model: Universal Ceiling Mounts
- Compatibility: All projectors in inverted position
- Specifications: Adjustable height, independent settings, universal compatibility.

---

**Installation Tips**

- Ensure correct alignment of image axis and attachment axis.
- Use stop screw for accurate height adjustment.
- Refer to installation manual for detailed instructions.

---

**Important Notes**

- Products are supplied with hardware and spacers.
- Order by part number for easy identification.
- Quality assurance from manufacturer.

---

**Customer Testimonials**

- "Excellent quality, easy installation, highly recommended." - John Doe
- "Great product, saves space and looks professional." - Jane Smith

CENTRAL AND LATERAL CABLE OUTLETS

The ERARD group is continuing to grow with the completion, at the start of 2018, of a strategic acquisition in the connector industry.

D3C, an SME based in Gennevilliers, formally known as ERARD D3C, was recently bought back to enrich the group’s connector offer in the B2B audio-visual market.

The location of the SME in Île de France will enable ERARD PRO to enhance its position with key accounts in the region, as the ERARD D3C and ERARD PRO sales teams will now be based at the head office of this new organisation.

With nearly 35 years’ experience, the company offers a wide range of cables, connecters and cords, both standard and bespoke.

For all requests relating to these products, please visit the ERARD D3C website.
